PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years building payment infrastructure and scalable web applications across fintech, SaaS, and e-commerce. Production experience integrating payment terminals, POS and kiosk systems, and REST/GraphQL APIs, owning delivery from React and Next.js frontends through Node.js and Python services to Dockerized cloud deployments. Recently built an AI customer support agent using RAG. Experienced working asynchronously with distributed teams and available for full-time remote roles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Kotlin, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Craft.js, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, Flask, GraphQL, REST APIs, Microservices

AI/LLM: RAG, pgvector, OpenAI, Anthropic, Gemini and DeepSeek APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: Docker, Portainer, AWS EC2, DigitalOcean, CI/CD, Git

Domain: Fintech, E-Commerce, Analytics Dashboards, Payment Systems Integration, POS & Kiosk Platforms

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer

Nov 2025 – Present

Appety Ltd. — Singapore

- Rebuilt payment services across POS, kiosk, digital menu, and delivery platforms using Express.js, GraphQL, Redis, and PostgreSQL, raising payment success rates to 99%.
- Built payment terminal integrations with Kotlin and Next.js, enabling secure real-time transaction processing between physical devices and cloud services.
- Developed the Appety Kiosk application and delivery menu site in React.js and Next.js, streamlining the ordering experience for thousands of users.
- Optimized backend services across Node.js, Express.js, GraphQL, REST APIs, Redis, and PostgreSQL, improving API response times by 35% on high-availability production systems.
- Managed cloud infrastructure on DigitalOcean using Docker and Portainer, reducing deployment time by 60% and improving system reliability.

Full-Stack Software Engineer

Apr 2024 – Nov 2025

DeemPay Technology Ltd. — Lagos, Nigeria

- Built DeemPay's multi-tenant AI customer support agent, an embeddable chat widget that resolves customer queries automatically for multiple merchants, taking it from build to pilot.
- Designed a RAG pipeline in Python and FastAPI with pgvector on PostgreSQL, grounding responses in DeemPay's documentation and FAQs.
- Built a no-code e-commerce website builder with Next.js and Craft.js, enabling merchants to launch online stores in minutes and reducing setup time by over 80%.
- Developed a real-time e-commerce analytics dashboard surfacing sales, inventory, and order insights that drove merchant decision-making.
- Engineered a crowdsourcing platform connecting organizations with a global contributor network, onboarding hundreds of organizations and thousands of users.

Software Engineer Intern

Apr 2023 – Mar 2024

DeemPay Technology Ltd. — Lagos, Nigeria

- Revamp a fintech payment dashboard in React.js and Next.js, improving usability, performance, and workflow efficiency for internal teams.
- Built end-to-end machine learning solutions in Python and Scikit-learn for price prediction and automated risk assessment, deployed on AWS EC2.
- Developed an e-commerce website with a team using Next.js and Tailwind CSS, expanding the brand's online presence and engagement with a wider customer base.

EDUCATION

B.Agric., Soil Science & Land Resources Management

Oct 2016 – Dec 2021

Nnamdi Azikiwe University — Awka, Nigeria
